

Long Handled Bendable Sponge

This long handled sponge is an excellent aid for the elderly or disabled, or others suffering from restricted movement. The sponge has been mounted on a 15" long plastic coated wire to allow the legs, feet and back to be reached by those with limited mobility. The wire is flexible enough to bend to any shape to make reaching easier and the handle is built up for extra grip. This item is also available in an extra long 24" version.
